La Botica de Almar is Lopand Game Studio's fourth game, in development for Android. Master Orbel, the alchemist of Brezo, goes away for a month and leaves his apothecary with his apprentices, the twins Enna and Tiago. For 30 days they gather ingredients, brew potions and serve the village's neighbors until he returns.

It's a cozy, front-view pixel-art shop management game: each day has its morning (the garden, the woods and Mother Sauce's cart), its workshop (the alembic), its afternoon (the counter) and its night (upgrades and decorating). It takes place before El Aprendiz de Almar and spoils nothing of its story.

FEATURES

- Almar's alembic: grind, mix in order and mind the fire; quality sets the price, the tip and your reputation.
- A 30-day story in five chapters, with 20 recipes that open up little by little.
- Twelve neighbors with stories who each come back three or four times.
- A day in four moments: garden and woods, workshop, counter and night, 8 to 12 minutes long.
- The shop grows: six upgrades and decorations to make it yours.
- Daily and weekly missions, a visit streak and Mother Sauce's cart (which can be haggled with).
- Free to play: the full story is free, ads only if you want them (up to 5 a day) and no loot boxes.
- For everyone, without asking for data: progress is saved on the phone.
- Art and design by Romina López; its own music, made in-house with recorded instruments.
