Quimeralia: Crónicas de Almar is Lopand Game Studio's fifth game, in development for Android. A hundred years before El Aprendiz de Almar, an alchemist newly arrived in the Valley of Brezo finds the valley's creatures, the chimeras, restless and sick with the Turbia, a purple sediment left behind by alchemy done in a hurry.

It's a creature-collecting game where chimeras are won with alchemy and never caught: through bond, purification, eggs, transmutation, pact or negotiation, with no luck or percentages. Fights happen in real time, in a separate arena, short and with no blood: chimeras get tired and give up.

FEATURES

- 68 chimeras across four essences (Ascuá, Rocío, Raíz and Vilano), each with its own entry, habit and place in the valley.
- Six ways to win them over, all of them alchemy or friendship, with no luck or percentages.
- Real-time arena: move your chimera, attack, use its abilities and switch chimeras; no blood and no permanent defeats.
- A journey through ten places, from the Fields of Brezo to the capital of the kingdom; each one opens with a potion.
- A workshop of your own with jobs, a twelve-niche display case and corners to decorate.
- The night, a recipe book of potions that need to rest, four valley festivals and a field notebook.
- 5 to 15 minute sessions, in landscape; options for large text, fewer flashes and no vibration.
- Free to play and for everyone.
